## Model TR-3535 Tripod Mount

### PARTS INCLUDED:

**ONE TIME ASSEMBLY:** Remove contents from carton.

Assemble each of the three legs by inserting the leg extension into the attached leg until the leg extension locks into place. See Figure 1.

### SET UP:

Fig. 1

Fig. 2

1. Set all three legs to the desired position by pinching the tabs holding the legs in place and moving the leg extension until it locks into the desired position.

2. Set up tripod in an area with a clear view of the sky — south west or south-southeast, depending on your location in the continental U.S.

3. Place bubble level on top of mount pipe and loosen the lock knobs on the adjustable legs.

4. Slide the legs towards or away from the center of the unit until the tripod is level.

4. After leveling, tighten the lock knobs and remove bubble level.

5. Slide satellite antenna\* onto pole and secure it to the pole. Use ground stakes to stabilize mount if necessary.

See Figure 2.

### ELEVATION ANGLE

Depending on your location, satellites will be at an elevation angle between 30° and 60°. Southern states point more toward 60°, northern states point more toward 30°.

### FINDING THE SATELLITE

1. Be sure to connect the cables to the TV, receiver and antenna before accessing satellite signal, and connect to your power source.

2. Check the instruction manual that came with your receiver to determine how to access the on-screen signal meter.

The signal meter shows you when you have locked onto a satellite broadcast signal and gives the signal strength. Be sure you select your type of dish antenna — pointing coordinates will depend on the type of dish you have.

3. **Azimuth value is determined by the local zip code of your location.** Enter into your receiver menu.

4. Rotate compass dial until azimuth value aligns with the **blue** arrow.

5. Turn compass to align red pointer arrow to red "N".

6. Point satellite dish in same direction as the blue arrow.

### TO STORE THE TR-3535

1. Remove the reflector.

2. Loosen the leg bracket knobs and collapse the three legs into the folded position.

3. Pinch the tabs holding the leg in the extended position and slide the leg extension back into the leg until it locks in the storage position. See Figure 3.

4. Tighten the knobs and store the tripod.
